Django/Python	Very proficient
SQL/NoSQL	Proficient

INTERESTS & HOBBIES

I am very interested in software development. I have a number of personal projects underway, which can be viewed on my [github page](#).

As a software developer, I enjoy the privilege of working my own hours, sometimes remotely, so I have plenty of time to pursue other endeavours.

Other endeavours include gardening – I grow a lot of my own food, and pottery – I'm currently working on my own pottery line for self use and for gifting.

I live near the coast where I take long walks on the soft sandy beaches.
